

# TOP 10 PRESCRIPTION DRUGS OUR PATIENTS TAKE AND HOW IT AFFECTS YOU

Americans are living longer. 7 out of 10 people take at least one prescription medication daily, with use increasing every year. Prescription drugs have become a significant part of our dental patients' lives. Because of these trends, it is increasingly important for us as health care professionals to understand the medications most commonly prescribed today. This session will address the underlying conditions necessitating their use and, as importantly, the related effects of these drugs in the treatment of the dental patients.

Peebles Center for Higher Education  
909 Wadsworth Blvd.  
Lakewood, CO 80214

## Gregory K. Ingalls, D.D.S.

A Denver, Colorado native, Dr. Ingalls has matriculated for 20 years in the state, through high school, college, and dental school (University of Colorado School of Dental Medicine). He completed his Oral & Maxillofacial Surgery Residency at the Medical College of Georgia in 1986, before returning to Denver to begin private practice. For 33 years, Dr. Ingalls has been privileged to help Colorado Regional Oral Surgery grow into a four-surgeon, state-of-the-art practice, with two locations along the western north/south corridors of Colorado's Front Range. Dr. Ingalls is Board Certified by the American Board of Oral & Maxillofacial Surgeons, a fellow of the American College of Dentists, and past president of the Colorado Society of Oral & Maxillofacial Surgeons. He has been on the dental faculty at the University of Colorado since returning to his Denver roots in 1986 and has been involved in various university and hospital-related GPR residencies for decades.

Bringing out the best  
in the lives we touch...

Creating Possibility.

COLORADO REGIONAL ORAL SURGERY
