

TRANSITION PLANNING: YOUR KEYS TO SUCCESS

This seminar will provide you with new insights into what to do and what not to do as you work to create WIN-WIN transitions.

This highly informative program will identify the necessary steps towards finding the "right" candidate or dental practice, review the necessary components for planning each step of the transition process, and help you recognize the importance of using a team-based communication model in attaining successful outcomes.

A team-based model for adding a dentist incorporates the behavioral and relationship factors that are key in ensuring a successful transition. This model also includes a formula for growing a buyer for your practice based on shared values and philosophies. Learn how to create a triple WIN for each other: you, your dental team and your patients.

At the conclusion, participants should be able to:

- Take the model and tailor it for your own unique needs.
- Design a specific transition plan
- Learn how to appropriately involve your team members in the implementation of your plan
