

Ivoclar Academy

CAD/CAM Study Club

Jon Smith DDS,
FAGD, DIDIA

Not All Zirconia is Created Equal

In this course, participants will learn tips and tricks for the most recent Cerec software and the different categories of CAD/CAM Zirconia choices based on composition and strength.

Participants will gain understanding of how to choose proper restorative material for different indications and case selection.

Topics will include

- New Material choices in CAD/CAM and appropriate selection for different clinical situations
- Dental Materials including flexural strengths of different zirconia categories, new aesthetic choices, how to choose the zirconia for your specific case.
